

CAPSTONE PROJECT REVIEW

As I have gone through your Capstone project, I would like to appreciate the way you have followed all the steps perfectly.

Also below are some suggestions and appreciation for your project.

- Applying comments (description) on our code is always considered the best practice in the industry when it comes to collaborative work. Since you have taken care of it on your project, that's great!
- We are really impressed by your different types of charts and graphs. You have taken care of almost all types of visualizations.
- Missing values in our data always create trouble when it comes to data analysis. So, handling it becomes critical before deriving any insights. You have perfectly checked it in your project.
- The Exploratory Data Analysis part looks fine.
- Scaling data in the same range becomes very important so that no column would get the unnecessary importance during the model building phase. You have successfully handled it in your project.
- In your project you have applied almost all the relevant machine learning models. So, model building part looks fine to us.
- You have clearly mentioned the conclusion of the project at the end.
- Apart from the above-given feedback, everything looks good from our end. We wish you all the very best for your future endeavors.
